# Newsletter

**Friday 13th March 2026**

Dear parents and carers,

A short half term and the fact that there are only two weeks left seems like time has also flown by. Coming up in the next few weeks we have parents' evening - please make sure that you come along to your appointment. Slots are 10 minutes long so please do make sure that you stick to those - if you need longer then you can always have a follow up or catch up with the class teacher on another day.

At the Junior School we have been made aware that pedestrians are following cars in through the vehicle gate when they are entering the car park. Please can we make sure that all pedestrians use the two pedestrian gates; cars reverse in the car park and it is not safe for people to be walking in and around the car park.

Over the past week I have had the privilege of watching the football teams in their respective matches. The girls' team are currently sitting top of the league with one game to go and have done incredibly well against much larger schools, showing real passion and teamwork and they are almost there. Go on girls and Mrs Batts!

The mixed B team are also currently top of their league and are just one win away from sealing the league title as well - they are almost there and have played so well. Yesterday they came back from 1-0 down and 2-1 down to gain a 2-2 draw away at Bedgrove, again showing such determination.

Finally, the A team, although they are top of their league, there are teams below who have games in hand so they are reliant on other teams winning and losing games to seal the title. However, they are through to the district cup final for the second year in a row. A remarkable comeback from 2-0 down to draw 2-2 and then win on sudden death penalties, once again, showing real courage and determination. Well done to all the boys and girls who part of these squads and thank you to Mrs Batts, Mr Hearn and Mr Meads for your time and effort in supporting the children.

Finally, I would like to thank those who came and volunteered their time on the bus project, removing most of the seats and preparing the bus ready for its next stage. We are so grateful for your time and also your donations to help turn this bus into our outdoor library. It will be a long project but it is lovely to get it started.

That is all from me today but I hope you all have a lovely weekend. If you have any questions, worries, concerns or compliments please do get in touch.

Mr Charlie Reed

## Important notices

### ARBOR Update

We are steadily transferring our communication and booking systems from Eduspot's School Money and Teachers to Parents to Arbor so parents will be able to view and manage payments and activities in one place. After the Easter Holiday parents will no longer be able to pay for wrap around care or school trips on School Money and all outstanding balances for these will begin to be transferred to Arbor from 13th April. Please note you can continue to make payments on School Money up until Monday 13th April.

School lunches will be available to view and book in School Money up to Friday 22nd May, but lunch bookings for after the May half term will all be managed in Arbor. Please bear with us as we make these changes and get used to managing payments in Arbor, we would value your help to ensure this runs as smoothly as possible so if there are any queries then please do come and speak to us. Your cooperation and feedback will be greatly appreciated. Thank you

### Dates for your diary

#### Infant School dates

Tue 17th Mar - Inter house Music competition Final  
Wed 18th Mar 3:15pm - Open classrooms  
Mon 23rd March - Reception Trip to MK Museum

1st	RED
2nd	YELLOW
3rd	BLUE
4th	GREEN

## What's been happening in Reception?

We have been learning about our new topic: Long Ago. We read the story of 'The Little Red Hen' and discussed how they made bread in the past. Then we had a go at making our own bread and kneading it. It was yummy!

We had such fun on World Book Day coming in as our favourite characters or in our comfiest clothes for reading! We created our own bookmarks and enjoyed having some of our grown ups come in and read with us. We listened to a live author who read 'Are You A Sleepy Monster' by Guilherme Karsten.

## Ensuring every child THRIVES

Here's some of our learning from around the classroom. In Maths, we have been exploring numbers to 10 and learning about subtraction using a part-whole model. We have been using stem sentences to support our explanations of subtraction and addition within 10. As part of our 'Long Ago' topic, we have been looking at old toys and objects, drawing what we see and guessing what they do. We have been making our own peg dolls to play with in the classroom.

At National Online Safety we believe in empowering parents, carers and trusted adults with the information they need to hold an informed conversation about online safety with their children, should they feel it is needed. This guide focuses on one platform of many which we believe trusted adults should be aware of. Please visit [www.nationalonlinesafety.com](http://www.nationalonlinesafety.com) for further guides, hints and tips for adults.

## Learning

### MAGIC PIANO BY SMILE

While Magic Piano doesn't strictly teach you how to play the piano, it does teach hand-eye coordination and can help spark creativity in young minds. Users can play along to a variety of popular songs on a range of difficulty levels in an attempt to get through the song with as few mistakes as possible, increasing dexterity and reaction times. Free on iOS & Android, the game does contain some ads and in-app purchases, so be sure to check these out before letting younger players unleash their musical side. Magic Piano is PEGI 3 rated but requires slightly more nimble hands to master so older kids will get the most from this.

### AZOOMEE

Azoomee houses over 1,000 games, videos and activities for kids of all ages to play, have fun and most importantly, develop their key skills in. The app is award winning, BAFTA nominated, supported by the NSPCC (according to the description on their app page) and comes with a suite of parental controls built in. As well as educational games, activities and kid's favourite TV shows, the app also has a built-in chat feature where they can talk to their friends safely. A nice little touch is that if you buy a subscription to Azoomee for unlimited premium content for £4.99 a month, a portion of the money raised goes towards supporting the NSPCC. The app is available on iOS, Android and Amazon.

### POLY BRIDGE

While Poly Bridge could be easily enjoyed solely as a game, it's actually an incredibly clever way to learn critical thinking and engineering skills in a kid friendly way. It's set in a colourful, cartoony world and has extremely simple gameplay. In Poly Bridge, it's your task to get cars, buses, trucks, boats and more safely to their destination by designing bridges that are safe and practical. How those bridges are created is entirely up to you. With over 100 levels, a sandbox mode and almost infinite playability, Poly Bridge is available on PC, Android, iOS and Nintendo Switch at various price points, so be sure to check which is the best option for you.

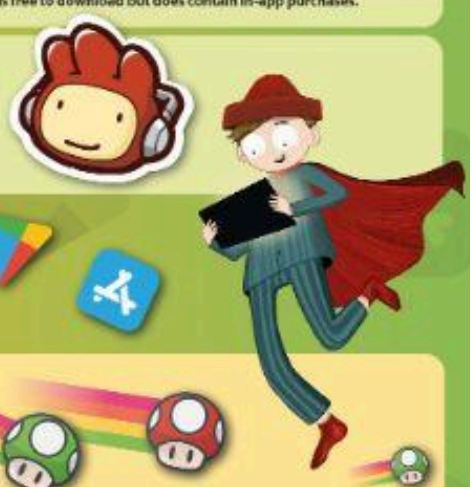

### CROSSWORD PUZZLES (WUBU APPS LTD)

Crossword puzzles might not immediately seem like a learning game for younger kids, but they're incredibly effective at building strong word skills and problem solving. This one by Wubu Apps Limited is exclusive to iOS and constantly changes its roster of daily crosswords and challenges, although there are a whole bunch of apps available out there which do similar things. The app is rated 4+ but would likely be suited to kids a little older as the crosswords are designed for adults as well. As mentioned, Crossword Puzzles is only available on iOS devices and is free to download but does contain in-app purchases.

### SCRIBBLENAUTS UNLIMITED

Scribblenauts is a game like few others in that it actively encourages children to use their intuition to solve a variety of puzzles. Armed only with their imagination, players must complete levels by conjuring potentially useful items for main character Maxwell to collect the Starites and achieve his goal. The game helps create strong vocabulary and word association to a fun 2D backdrop. While any version of Scribblenauts is good, Unlimited is the most readily available, being released on Wii U, PC, Nintendo 3DS, iOS and Android devices, PS4, Xbox One and Nintendo Switch.

National Online Safety  
#WakeUpWednesday

## Just for Fun

### SUPER MARIO ODYSSEY

Widely regarded as one of the greatest games Nintendo have ever made, Super Mario Odyssey provides family friendly fun and a challenging environment for kids to learn new skills in a video game. Rated PEGI 7, Odyssey can be enjoyed by almost any age range, even those who are young at heart. The caveat is that the game is only available on Nintendo Switch, so some investment will need to be made, but the console boasts a host of other child-safe titles and the ability to play on the go as well as at home.

### NETFLIX

NETFLIX

As obvious as it may sound, Netflix's children's section is ideal for keeping young ones and toddlers out of trouble on long journeys or at home. The specific profile for kids allows them to only view content appropriate for younger audiences which lets you and them watch their favourite shows and movies anywhere, at any time. Curated playlists, easy navigation through TV series and movies, and no-hassle auto-play means a stress-free guarantee. The only downside to the app is that it requires a Netflix subscription in order to use it but if you're happy to pay the monthly cost, it's an absolute must for any parent.

### MINECRAFT

Minecraft is one of those rare, timeless classics that can be enjoyed by every age group. Coming in both a console version and a pocket edition for mobile devices, the sandbox world-building fun in Minecraft can be an amazing place to let your imagination run wild. The game can be played online with friends and supports cross-play, meaning that no matter what device everybody has, it can be played together. While the game isn't free, it will undoubtedly provide hours and hours of fun for the whole family so it's worth the investment of a one-time purchase. As one of the most popular games ever released, it inspires critical thinking, problem solving and above all, fun.

### LEGO MOVIE MAKER 2

The LEGO Movie Maker 2 app lets users create their own stop-motion movies and upload them for others to watch online. Kids can create a short LEGO movie in whatever genre they like using a range of easy to use tools and are able to add in sounds and visual effects to make the videos look super realistic. All movies are moderated before they make it online so you can be sure no sensitive information is uploaded or viewed by third parties. The app is free to download on both iOS and Android devices but does require creation of a LEGO account to upload videos. The only information needed for an account is the country you live in, your email address and date of birth. While it's rated for 4+, kids of 8 and up will get the most out of this one.

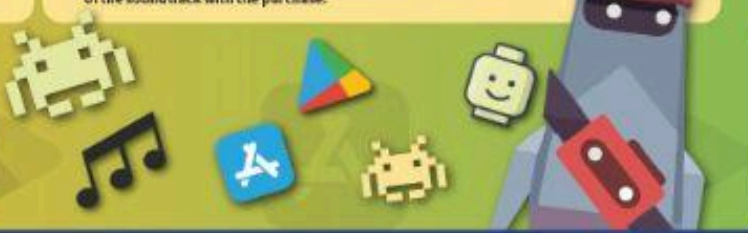

### ADVENTURES OF POCO ECO: LOST SOUNDS

If something more slow-paced and chilled out is on your radar, Adventures of Poco Eco should be able to scratch that itch. With an emphasis on creating a rich and inviting musical soundscape over hardcore gameplay, the puzzle action is perfect for unwinding young minds, as opposed to challenging them. The single-player game is available on all iOS and Android devices, as well as the Amazon Kindle Store and you can also nab yourself a free copy of the soundtrack with the purchase.

## Meet our expert

Mark Foster has worked in the gaming industry for 5 years as a writer, editor and presenter. He is the current gaming editor of two of the biggest gaming news sites in the world, UNILAD Gaming and GAMINGible. Starting gaming from a young age with his siblings, he has a passion for understanding how games and tech work, but more importantly, how to make them safe and fun.
